OPERATIONS

BHK, through its subsidiary Dome International Global Inc., is a mineral resource company engaged in the exploration for manganese and gold on its Ndjole property located in Gabon, in West Central Africa.

BHK is in the exploration phase and the Ndjole Property is not currently in production.

Additional financing will be required for new exploration and/or production decisions on its principal mineral property and other business initiatives. Due to the inherent nature of the mineral exploration industry, the Company will have a continuous need to secure additional funds through the issuance of equity or debt in order to support its corporate and exploration and development activities, as well as its share of obligations relating to mineral properties.

The Company’s operations during the first quarter and up until April 27, 2017, have been discussed in depth in the Company’s Annual MD&A. BHK is actively seeking additional funding to undertake a major surface exploration and drilling program to explore the Mimbanya Manganese anomaly and undertake surface geological mapping, soil auger sampling and trenching at the Ndjole North Manganese anomaly during the remainder of 2017.

FINANCIAL CONDITION AND PERFORMANCE

Financial Condition

During the quarter ended March 31, 2017, the Company’s working capital deficiency increased by \$102,285 to \$149,008 mainly due to an increase in short-term loan to fund corporate activities.

There were no asset acquisitions in the quarter.

Performance

During the quarter the Company incurred a net loss of \$141,184 compared to \$475,641 for the same period in the prior year. The reduction in the net loss of \$334,457 is primarily attributable to the curtailment of exploration activities and introduction of cost saving measures during the 2016 financial year to preserve cash expenditures.
