BHK Identifies North East Target as Priority for 2015 Drill Program

Vancouver, June 15, 2015 - BHK Mining Corp. (TSXV: BHK.V) ("BHK" or "the Company") reports that it has identified the first drill targets at the Company's manganese exploration prospect on the 100 percent owned, 2,000 square kilometre, Ndjole Licence, in central Gabon.

In 2011 Silver Bull Resources Inc., previous holders of the Ndjole licence, completed a series of core holes as part of a gold exploration program and carried out ICP multi-element analysis on the drill core. Seven of these drill holes contained over-limits manganese assays (>11% Mn). In March 2015, coarse rejects (splits) from these over-limit intersections were submitted to ALS Chemex in Johannesburg for XRF analysis.

This news release details the assay results of these re-assayed drill hole intersections. The full assay results and location of these drill holes are published on the Company's website: www.bhkminingcorp.com.

Significant Assay Results (>15% Mn):

Hole NDDD0001	1.5m @ 27.40% Mn 3.5m @ 28.72% Mn
Hole NDDD0002	22.5m @ 26.74% Mn including 3m @ 50.87% Mn 9m @ 19.34% Mn including 1.5m @ 39.83% Mn
Hole NDDD0008	1.5m @ 32.95% Mn
Hole NDDD0012	No significant results
Hole NDDD0018	No significant results
Hole NDDD0027	3m @ 16.19% Mn
Hole NDDD0028	3.75m @ 28.14% Mn

Hole NDDD0002 is a promising intersection of wide manganese mineralization and includes a high-grade layer of 3m @ 50.87% Mn. Recent exploration activity has been focused on the North East manganese

target which includes Hole NDDD0002. The North East target will be the first priority for the drill program planned for the second half of 2015.

About BHK Mining Corp.

BHK understands the potential for a well-managed, professionally run junior exploration company in Gabon. The acquisition of the Ndjole Licence, where a new discovery of high-grade, near-surface manganese mineralization had been made, opens the door to further opportunities in this Central African country. Gabon is among the top four manganese producers in the world.

Qualified Person

All technical information in this press release has been reviewed, approved and prepared under the supervision of David Underwood, Vice President Exploration who is the Company's "Qualified Person" under the definitions set forth in the National Instrument 43-101 *Standards of Disclosure for Mineral Projects* of the Canadian Securities Administrators.

On behalf of the Board of Directors

Claus Andrup
Director & Chief Executive Officer

Forward Looking Information: *This news release includes certain information that may be deemed "forward-looking information". Forward-looking information can generally be identified by the use of forward-looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans" or similar terminology. All information in this release, other than information of historical facts, including, without limitation, the potential of the Ndjole Licence, the timing and success of exploration activities generally, and general future plans and objectives for the Ndjole Licence is forward-looking information that involve various risks and uncertainties. Although the Company believes that the expectations expressed in such forward-looking information are based on reasonable assumptions, such expectations are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking information. Forward-looking information is based on a number of material factors and assumptions. Factors that could cause actual results to differ materially from the forward-looking information include unsuccessful exploration results, changes in project parameters as plans continue to be refined, results of future resource estimates, future metal prices, availability of capital and financing on acceptable terms, general economic, market or business conditions, uninsured risks,*

regulatory changes, defects in title, availability of personnel, materials and equipment on a timely basis, accidents or equipment breakdowns, delays in receiving government approvals, and other exploration or other risks detailed herein and from time to time in the filings made by the Company with securities regulatory authorities in Canada. Mineral exploration and development of mines is an inherently risky business. Accordingly, actual events may differ materially from those projected in the forward-looking information. For more information on the Company and the risks and challenges of our business, investors should review our annual filings which are available at www.sedar.com. The Company does not undertake to update any forward looking information, except in accordance with applicable securities laws.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
